

Burlington

Beginning 1/23/17, Burlington will implement new driver check-in procedures at the gates of its facilities. The new procedure will incorporate **two new forms, Receiving Stamp Template and Trailer Inspection Form**, these will be available to the freight tab of the [vendor website](#). These forms will be filled out by Burlington yard security, and which **the driver will be expected to sign**. This procedural enhancement is intended to drive **more-thorough inspection of the equipment** and load upon arrival, which we expect to **reduce the number of disputed claims**.

Below are a few highlights:

- Seal verification at the gate
- Trailer inspection
- Driver signature required

Thanks for your continued partnership on this process improvement.
